DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Bell. The valve 38 is readable on the check valve when it closes by the level of the liquid in the expanded chamber of the pipeline 12. Intended use is afforded no patentable weight, therefore, the pipeline could be any type, such as a wastewater, refrigeration, condensate and many others, for removing, cleaning or purging a blockage within the pipeline. The float rod or shaft 17 (figure 2) extends through the expanded portion of pipeline 12 and communicate with switch 20. Solenoid 40 allows the claimed burst of compressed air.

Allowable Subject Matter

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
